

CLAIMS

What is claimed is:

Sub
B21

1. An apparatus for accessing and displaying multimedia content,
comprising:

5 (a) database means for storing multimedia content records and references to
media files for a multimedia presentation; and

(b) software engine means, executable on a computer, for seamlessly
accessing a content record in said database means and locating and displaying media
elements referred to in that content record.

10 2. An apparatus for accessing and displaying multimedia content,
comprising:

(a) a database containing multimedia content records and references to
media files for a multimedia presentation; and

(b) a software engine, executable on a computer, said software engine
seamlessly accessing a content record in said database and locating and displaying
media elements referred to in that content record.

15 3. An apparatus for accessing and displaying multimedia content,
20 comprising:

(a) a programmable data processor;

(b) a database containing multimedia content records and references to

media files for a multimedia presentation; and

(c) programming associated with said programmable data processor for carrying out the operations of seamlessly accessing a content record in said database means and locating and displaying media elements referred to in that content record.

5

4. A computer program for accessing and displaying multimedia content, comprising a set of instructions stored on a media accessible by a computer and executable on said computer, wherein said computer program performs the steps of seamlessly accessing a content record in a database and locating and displaying media elements referred to in that content record.
